BABY SPLICE IS BORN

A sophisticated ISDN Business Telephone System with IP, Analogue and Voicemail at LESS THAN £2000

Baby Splice, the 4140 Remote Call Server, extends the cost-effective reach of SpliceCom's award winning **maximiser** business telephone system down to the branch offices of larger organisations and meets the standalone telephony requirements of smaller businesses.

Combining the core functionality of SpliceCom's larger Call Server, Trunk and Phone Modules within a single small enclosure, it delivers the very same advantages and benefits as larger **maximiser** systems all in one box.

- Up to 8 basic rate ISDN trunks
- Up to 15 primary rate trunks
- Up to 40 extensions - IP or analogue
- 4 port, 10 hour voicemail / auto attendant
- 10/100 LAN Port plus IP WAN interface
- Integrated Apache web server

For larger organisations seeking an IP enabled branch office solution, or for a standalone small business user, the 4140 Remote Call Server provides the most cost-effective means of achieving these requirements. Through the provision of a single unit that supports a smaller number of extensions and trunks than the 4100 Call Server - but does not compromise on the features and facilities it provides - the 4140 Remote Call Server delivers the perfect 'small of large' offering in extended **maximiser** networks of up to 5000 extensions.

Notes for Editors

SpliceCom is a privately funded company, whose management team were behind the two most successful UK voice and data convergence companies - SDX Business Systems and Network Alchemy. SpliceCom's product, the **maximiser** Business Telephone System, which is designed and manufactured in the UK, combines voice, video and web enabled IT applications within a single system, providing tangible business benefits for all types of companies, irrespective of their size. Launched in April 2003, **maximiser** currently has 20,000 ports installed and was voted 'Best New Product' at the Comms Channel Awards 2004. These products are only available via selected resellers and systems integrators - they are not sold directly, nor are they available via distribution.
